JA SOLAR

JA Solar Company Presentation

Company Overview

Headquarters

■ Beijing, China

Date est. / IPO

■ May 2005 / February 2007 (NASDAQ: JASO)

Capacity
Guidance by
end of 2017

■ 7 GW solar module

■ 6.5 GW solar cell

■ 3 GW silicon wafer

Shipments

■ 2014: 3.1 GW ■ 2016: 5.2GW

■ 2015: 4.0 GW

■ 2017: guidance 6.5-7GW

Employees

■ 13,524 as of June 2017

Business Highlights

Industry Leader

Solid Finance

Optimized Vertically Integrated Model

 Global Market Coverage and Diversified Customer Base

Advanced Innovation

Products Advantages ■ High conversion efficiency

■ High reliability

■ High yield efficiency

Advanced Innovation

■ Global leader of PV cell technologies through innovation and invention

- PV technology leader with a six-month leading edge ahead of the others
- > The first company in the world started mass producing and commercializing selective emitter, MWT, and PERC structured PV cells
- > The first company in the world applied double-printing technology to all cell manufacturing lines

- The efficiency of independent innovation main products-Cypress 5 cell is 0.4% higher than the industry average.
- The conversion efficiency of PERCIUM mono cell is 1.3% higher than the industry main products.
- The conversion efficiency of RIECIUM mono cell is 0.6% higher than the industry main products.

Product Advantages – High Reliability

——Industry-leading Cell Technology

- World-class cell R&D staff and research platforms, leading other manufacturers by 6 months in cell R&D since 2008
- The only PV manufacturers company 100% implementing high-aspect-ratio double-printing in the industry
 - ✓ Addresses contact resistance and solderability optimization without compromising one or another
 - ✓ Less finger interruption
- Superior PID-resistance performance

Product Advantages - High Reliability

——High-quality Components from Best Suppliers

EVA

- √ High transparency, reliable quality
- ✓ High durability against PID degradation and UV yellowing

Back Sheet

✓ Fluoride material ensures excellent resistance against harsh environment and low water vapor penetration.

Junction Box

- ✓ Source from reputable tier 1 diode manufacturers to reduce hot spot risks
- ✓ Potted J-Box ensures excellent ingress protection performance

Aluminum Frame Glass EVA Back Sheet

Glass

- ✓ Closed Nanoscale structure AR-coating ensures excellent reliability and anti-soiling performance
- ✓ High transparency, reliable quality
- ✓ Excellent scratch resistance

Aluminum Frame

- Outstanding surface treatment technology and higher line density ensure strong corrosion resistance and mechanical strength
- ✓ High salt & ammonia resistance

Product Advantages - High Reliability

- 100% in-house automatic module manufacturing to guarantee product quality and performance
- Manufacturing Process, Quality, and Facility Certified by TÜV SÜD, CTF and ETL, and Third-Parties Agencies Including PI-Berlin and Solar-IF
- Long-term Reliability Tests
 - ✓ Mechanical load test 5400Pa to 10000Pa (about 2×IEC standard)
 - \checkmark HAST test DH1000 (85°C and 85% RH) to 121°C 3 times atmospheric pressure and 100%RH
 - ✓ Thresher test (about 3×IEC standard)

	IEC Standard test	Thresher test		
	Thermal cycling, 200 cycles	Thermal cycling, 600 cycles		
	Damp heat 1000 hour	Damp heat 3000 hour		
	UV 15KWH	UV 45KWH		
(Humidity freeze 10 cycles	Humidity freeze 30 cycles		
	Hot spot endurance 5 hour	Hot spot endurance 20 hour		

■ Environment Endurance Tests

- ✓ Ammonia Resistance Test Salt Mist Spray Test, S02
 Resistance Test, Dust and Sand Test
- ✓ Hot-Dry Climate, Damp-Heat Climate, and Plateau Climate
 Conditions

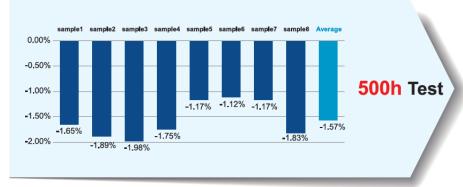

Product Advantages – High Reliability

- 100% Mass-production of PID-resistant Cell and Double 85 Anti-PID 96 hours test standard for All Modules
 - ✓ PID: Potential Induced Degradation

RIECIUM Module Degradation After 500-hour PID Test (Test Condition: 85%RH 85°C -1000V 500Hr)

Excellent Quality Management System and Product Quality Assurance

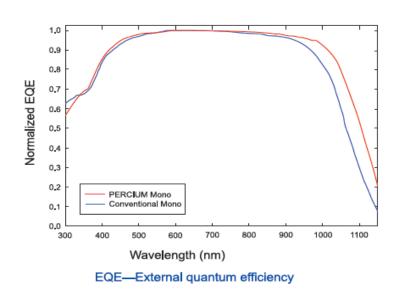

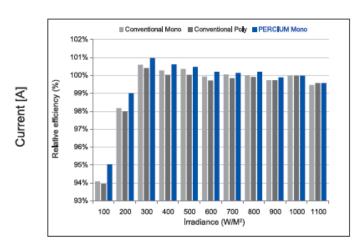

Product Advantages – High Yield Efficiency

Outstanding Low-light Performance

Relative module efficency comparison under different irradiance

■ The modules are classified into three current category

- ✓ Current class—H (high)
- ✓ Current class—M (middle)
- ✓ Current class—L (low)

After Sale Service

Product Warranty

- √ 12-year warranty on materials and workmanship
- ✓ 25-year linear power warranty (>80%)

Additional Insurance Options

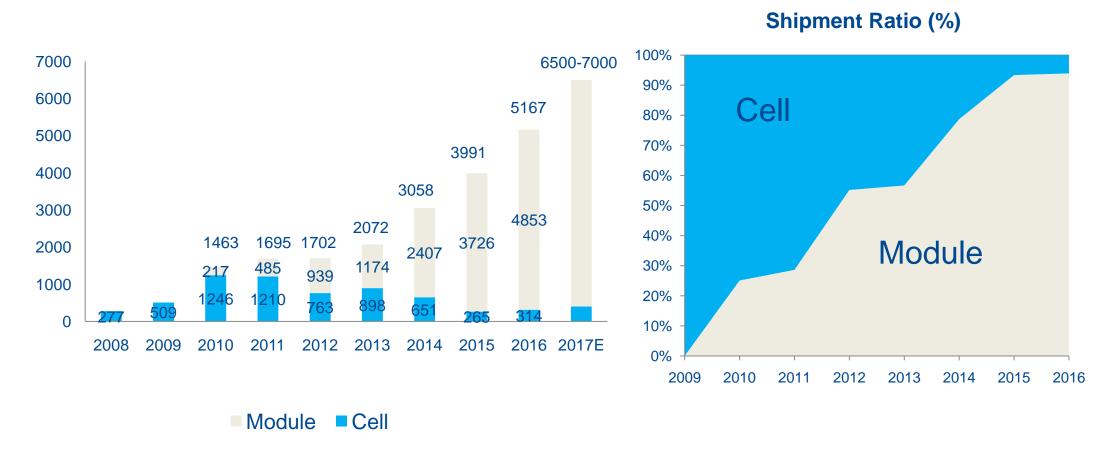

Industry Leader

——more than 25GW cumulative shipments by the end of 2017 Q3

Global Leading Bankable Module Brand

CSR – Corporate Activities

■ USA: Donated modules to Stanford University for its construction of the Bioengineering & Chemical Engineering building.

China: Sponsors Peking University, Tsinghua University, and Tongji University in their participation at the "Solar Decathlon SD".

■ **Haiti:** Following Haiti's earthquake, JA donated PV modules to the local fish farmers for electricity generation

CSR – Corporate Activities

Sunshine project:

Since 2011, JA Solar has provided medical assistance for total 202 poor cataract patients. JA will continue to provide medical assistance to more poor cataract patients.

Hope primary schools project:

In 2016, JA Solar donated 2.85 million RMB to build 11 hope primary schools. JA have built 59 hope primary schools until now and we will continue this project.

Poor student assistance projects:

JA Solar will fund in total 10,000 poor students to complete their studies.

Harvest the Sunshine Premium Cells, Premium Modules

Thank you!
